

Which method header declares a method that takes two `int` values and returns an `int`?

- A. `method add(int a, int b) int`
- B. `void add(int a, int b) returns int`
- C. `add(int a, int b): int`
- D. `int add(int a, int b)`

The answer is: D

What does `new Car()` do in Java when `Car` is a class?

- A. Creates a new object instance of `Car`
- B. Deletes the `Car` class
- C. Converts `Car` into an interface
- D. Imports the `Car` package

The answer is: A

How many times does this loop print `go`?

```
for (int i = 0; i < 3; i++) {  
    System.out.print("go");  
}
```

- A. 2
- B. 3
- C. 4
- D. It never stops

The answer is: B

What is printed?

```
String s = "Java";  
System.out.print(s.length());
```

- A. 5
- B. 0
- C. 4
- D. A compilation error

The answer is: C

Which expression is true when `age` is `20` and `student` is `true`?

- A. `age < 18 && student`
- B. `age == 18 && !student`
- C. `age > 30 || !student`
- D. `age >= 18 && student`

The answer is: D

The answer is A

What is a constructor used for?

- A. Initializing a new object when it is created
- B. Ending a loop early
- C. Comparing two strings alphabetically
- D. Importing a package

Which modifier allows a member to be accessed from any class?

- A. `private`
- B. `public`
- C. `package`
- D. `local`

The answer is: B

What is the main role of the Java compiler?

- A. It directly manufactures CPU hardware
- B. It deletes source files after execution
- C. It translates Java source code into bytecode and reports compile-time errors
- D. It stores user passwords automatically

The answer is: C

Which preparation task best matches Oracle 1Z0-811?

- A. Tuning Exadata storage cells only
- B. Configuring Fusion ERP ledgers only
- C. Troubleshooting telecom SIP headers only
- D. Practicing Java fundamentals such as variables, control flow, arrays, strings, classes, methods, constructors, and basic object behavior

The answer is: D

What will be the output of the following code

```
import java.util.Arrays;
import java.util.Comparator;
public class ComparatorTest {
    public static void main(String args[])
    {
        String[] ar= {"c","d","b","a","e"};
        InnerClass in=new InnerClass();
        Arrays.parallelSort(ar, in);
        for(String str : ar)
            System.out.println(str + "");
        System.out.println(Arrays.binarySearch(ar, "b"));
    }
    static class InnerClass implements Comparator<String>
    {
        public int compare(String s1, String s2)
        {
            return s2.compareTo(s1);
        }
    }
}
```

☐ edcba-1

☐ abcoed

☐ dbcea1

☐ ebadc

The answer is: A
